

RET Surveys Instructions

Any RET program may utilize these surveys. They may be analyzed internally at each site, or you may send the completed surveys to us and we will analyze them in conjunction with data from other sites. The purpose of the surveys is to evaluate various aspects of the RET program. Therefore, it is not to grade each site, but rather to look for trends across sites and thereby evaluate the program as a whole.

What we suggest is that each site collect all three (pre and post and mentor) surveys, matching them to each other before sending them to us. Paper-clipping them together would suffice. Another option would be to devise a unique identification number for each participant indicated on each survey, and then providing the mentors name for each one. Or, you may write some version of the participants names on each survey. (If you do indicate their names in this way, we would then devise unique identification numbers for participants to provide confidentiality.)

If you have any questions or concerns about our collection and analysis of the surveys, please contact Suzanne Coshow at coshow.1@nd.edu.

Program Administrators should complete the form below and send with the surveys:

Program Administrator Name and Title: _____

Site: _____ Setting: _____
(Univ. Lab, fieldwork, etc.)

Dates of Program: From _____ to _____

Brief description of program:

Stipend Level for Participants (if any): \$ _____ Credits offered (if any): _____

Send completed surveys to:

Suzanne M. Coshow, Ph.D.
Outreach Coordinator
